How this plan works

Now 40, Anwar's priorities for his family have shifted. While protecting and caring for his family still remain important, he also wants to build a legacy to pass on to his children. FWD Invest First Plus – Legacy Plan is an investment-linked takaful plan that lets him achieve both by balancing his needs for protection and growing his savings through investments simultaneously.

He opts in for the auto sum cover increase so his Sum Covered increases to RM650,000 at Year 6.

Anwar chooses to participate in the plan at the minimum Sum Covered of RM500,000 with coverage term up to 80 years old.

At 65, Anwar meets with an untimely accident and passes away. His family receives a payout of RM1,300,000 (200% of the sum covered) and also the Participant's Savings Account value.

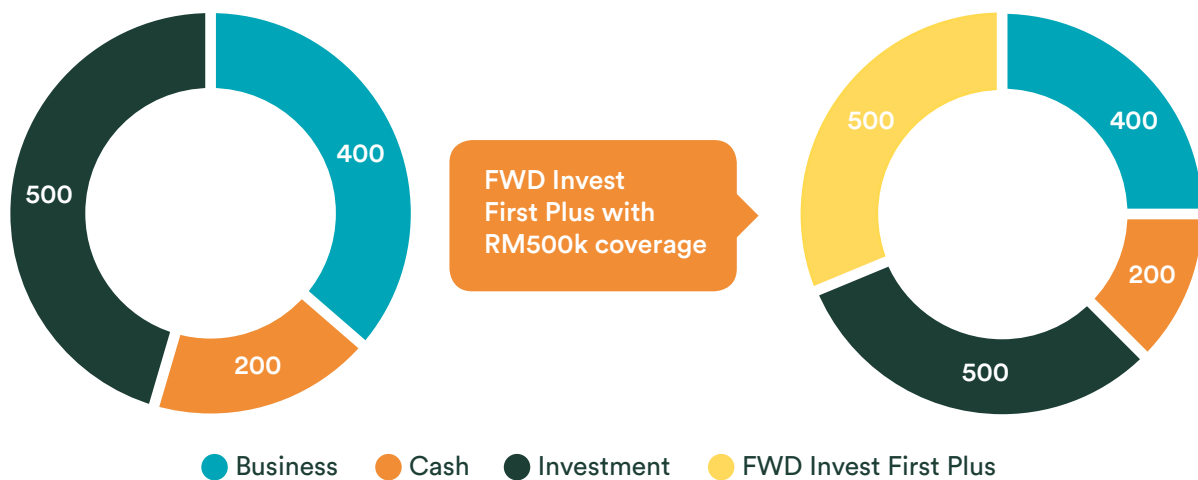

His family can also access Grief Counselling and Legal Consultation benefits to help them through this difficult period and attend to any legal affairs resulting from Anwar's death. The plan will also provide Badal Hajj support for his family.

First step: Assess how you would like your legacy to be distributed

The rate with which the daily cost of living is rising is very much likely to dent the value of your savings. So if you want to provide reasonable financial security to your family then you may want to consider FWD Invest First Plus to enhance your legacy.

For example, Anwar has three sons and a daughter. He is confident that his daughter is competent to manage and take over his business. But he also wants to provide reasonable financial security to his three sons.

If Anwar were to pass away, his daughter can inherit his business and his liquid assets can be distributed among his three sons with all receiving equal share of their father's legacy.

Second step: Balance your objectives and principal considerations

When it comes to investing for legacy planning, you should clearly assess your financial capacity and weigh it against your willingness to take risks as well as the type of risk(s). It's important as investing in an investment-linked takaful plan is a long-term commitment.

What risk and reward means to you?

No investment is risk-free. While cash protects the principal, its low returns may hinder you from reaching your financial objectives. If you prudently diversify into riskier assets it may help you to contain uncertainty. However, it also cannot assure you profit or protect you against possible loss.

How do you decide which type of funds to invest in?

When it comes to money, there are a number of factors that contribute to the 'How' and 'Why' of our decisions.

The following is an example of four key personality traits which can help you to evaluate which fund choices suit you. This can be a simple guide to assess what kind of investor you are.

| Accumulators | Followers | Preservers | Independents |
|--|---|---|--|
| <ul style="list-style-type: none"> Keenly interested to accumulate wealth. Want to steer investment decisions. Confident of the investment decisions they make. | <ul style="list-style-type: none"> Likes to follow friends or new investment fad. May lack interest or knowledge in investing. Decision-making process often lacks long-term planning. | <ul style="list-style-type: none"> Emphasise financial security. Anxious about losses and short-term performance. Fear of making wrong investment decisions. | <ul style="list-style-type: none"> Hold original ideas and like to be involved in the investment process. Often very analytical and critical thinkers. May exhibit bias in decisions due to own research. |

An early start will help you to minimise the impact of inflation.

What does it mean to you?
 Because even modest inflation can erode your purchasing power very drastically!

Even at today's low levels, inflation can exact a heavy cost on the value of your money – making it insufficient when you need funds.

All top up contributions will have 5% Wakalah fee. You may refer to the benefit illustration for the Wakalah fee of your specific certificate term selected.

How are we Shariah-compliant?

1. We manage your contribution and our takaful operations are based on the Shariah contract of Wakalah and guided by our Shariah committee.

Takaful is a mutual assistance scheme based on the spirit of brotherhood and solidarity where you and others agree to assist each other financially if anyone of you suffers a specific loss.

Wakalah is the appointment by one party of another to act on his/her behalf.

2. We allocate your contributions, less the Wakalah fee into the Participant's Savings Account (PSA). We'll deduct tabarru' from your PSA every month and allocate in the Participant's Risk Fund (PRF). The tabarru' are used to pay the benefits to claimants who are entitled to it based on:

- the solidarity of brotherhood and cooperation among the participants; and
- terms and conditions within the certificate

Tabarru' is a donation for the purpose of takaful.

3. In case of the good performance of the PRF, we'll be compensated 50% of the surplus as Ju'alah and the remaining 50% will be distributed to eligible participants.

If the value of PRF is insufficient to pay the claims, then we'll give Qard which is a benevolent interest-free loan to PRF.

Ju'alah is the reward to the Takaful Operator for the good performance of the participants' risk fund.

Service wakalah charge

We will be deducting RM10 per month from your Participant's Savings Account.
